SUNWIRE

Solutions that **shine**

SolSwitch™

Multi-Tenant and Carrier Platform

Overview

Sunwire's SolSwitch Multi-Tenant and Carrier Platform is for those who purchase their own SolSwitch equipment and appropriate licence to build their own infrastructure. SolSwitch owners can then offer hosted services to customers on their own appliance. Perfect for buildings looking to offer phone service to its tenants and make additional revenue.

**Customer Management:** Add, edit, remove, host and oversee customers on your SolSwitch.

911 Service Provider Integration: Re-assure your customers by having direct 911 integration for your hosted clients.

Customer Call Reports: A report outlining existing customers as well as their call usage levels.

Toll Plan Management: Manage your customers' long-distance regions, rates and rate plans.

Toll Reporting: Get customer reports regarding their toll plans as well as long-distance reports.

The Multi-Tenant and Carrier Platform also allows for total control of tenant billing, configuration, installation, training and support. Partners are also free to set their own toll free and long-distance rates for each of their customers.

Multi-Tenant Phone System Platform — SolSwitch™

Tenants: Tenant 1, Tenant 2, Tenant 3, Tenant 4
